

# Administration Solutions

## Security Administration Suite

NetIQ's Security Administration Suite helps protect you from internal security threats by providing enterprise-level privilege management for your Windows environments. The integrated suite eliminates the problems of deploying point products from multiple vendors. This suite includes Directory and Resource Administrator, NetIQ Group Policy Administrator and Directory Security Administrator.

## Directory and Resource Administrator

NetIQ's Directory and Resource Administrator provides highly secure and automated delegation of Windows account administration. Using its advanced delegation and powerful, policy-based management capabilities, you can dramatically increase security, protect the integrity of your data and reduce administrative efforts and costs.

## Exchange Administrator

As a powerful add-on to NetIQ's Directory and Resource Administrator, Exchange Administrator provides single-point policy-based administration for Exchange mailbox management across your enterprise. With this product, you can define policies that are automatically enforced and propagated across all directories, mailboxes and distribution lists.

## Directory Security Administrator

NetIQ's Directory Security Administrator provides innovative Active Directory permissions management capabilities, which include powerful role-based security, auditing and advanced analysis. Its straightforward graphic interface makes it simple for you to manage, analyze, audit and modify Active Directory access control lists (ACLs). With Directory Security Administrator, you can easily manage Active Directory permissions to reduce security risks.

## NetIQ Secure Password Administrator

NetIQ's Secure Password Administrator extends NetIQ's Directory and Resource Administrator to provide an agentless, web-based interface to allow end users to manage their own Windows passwords. Secure Password Administrator helps lower the administrative costs typically associated with password administration by offering self-service solutions that do not leave you vulnerable to security breaches.

## The NetIQ Migration Suite

The NetIQ Migration Suite delivers greater functionality at about half the list price of other solutions. With NetIQ, you get a solution that accelerates the transition between platforms while minimizing the impact on IT resources. This comprehensive suite delivers a strong return on your investment if you are migrating to Windows 2000/2003 and Exchange 2000/2003 from Windows NT and Exchange 5.5.

## File Security Administrator

NetIQ's File Security Administrator delivers a complete file security management and reporting solution for your Windows 2000/Active Directory environments. This product's straightforward interface and extensive, flexible reporting features simplify tasks, such as determining who can access your file system, eliminating and preventing enterprise security holes and reporting on storage utilization. Its ActiveReporting feature pinpoints trouble spots so you can take corrective action.
